## AIR LOGIC ANNOUNCES THE 'ATMOSPHERES' TRAVEL CARD PROGRAM

Air Logic, the largest FAA and DOT Part 135 certified air carrier in the Tampa Bay area has unveiled its own travel card program called *Atmospheres*. Launched in response to the rapidly increasing demand for prepaid flight time, *Atmospheres* offers the flexibility of one way pricing, the deep discounts of round trip pricing, and the exceptional safety, service and excellence that has made Air Logic the leader in high end air charter. Unlike other travel card programs, Air Logic owns and operates its own fleet of state of the art business jets which allows it to control costs and better serve its clients.

Until this point, *Atmospheres* has been an exclusive program available only to a special group of Air Logic clients. With the expansion of the Air Logic fleet and the tremendous interest in the program, *Atmospheres* is now available on a wider scale. Air Logic expects to add only four *Atmospheres* clients for every aircraft added to the fleet, which means that the program will remain exclusive. This will ensure a high degree of availability for both *Atmospheres* and on-demand clients.

## About Air Logic Solutions

The mission of Air Logic is to be Florida's premier corporate aviation company with its primary objective of *consistently exceeding our customer's expectations*. We are committed to bringing the highest standards of safety and service to the private air carrier, aircraft charter, aircraft management, brokerage and aviation consulting markets.

Air Logic is the leader in aircraft management and air charter businesses in West-Central Florida. We are the largest FAA and DOT Part 135 certified air carrier in the Tampa Bay area. We believe that safety, blended with excellent service is the foundation for a successful air charter business. Air Logic, headquartered in Tampa, is currently providing worldwide air charter, aircraft management and aviation consulting services. Air Logic owns and manages a fleet of state-of-the-art Challenger 604, Beechjet 400A, Hawker 800XP and King Air aircraft.

Safety is our number one priority. All of our aircraft are maintained under Factory approved programs, which meet or exceed FAA requirements. Our pilots are highly experienced and exceptionally well qualified. We require our crews to be trained to equivalent standards as those maintained by major airlines. Our Captains average 6500 hours of flight time and First Officers average more than 3000 hours of flight time. Our crews are trained at Flight Safety twice annually. The FAA or its designee also tests our crews every 6 months.
